

# REMIVA, s.r.o.

---

## Basic test - 45 eur

Density  
Measuring of MFI or MVR of material

## Spectral analyze with IR - 60 eur

Declaration of the material with IR (infra red).

## Termo gravimetric analyze TGA - 75 eur

Measuring exact portion of filling inside granulates. Fillers like CaCo<sub>3</sub>, Talc, GF and so.

## Termic analyze - DSC - 70 eur

Declaration of melting and crystalization temperature of polymers and other plastics materials (ISO 11357-3)  
Analyzing types of polymers inside granulate

## Optical spectroscopy 40 eur

Comparing colors of granules, regrind or products.

## Humidity test - 40 eur

Declaration of % of humidity inside pellets, regrind or powders.

## Tensile stress and tensile strain at yield testing - 110 eur

Testing is for films, plates or laboratory testing sheets.
